Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed a recording and reproducing apparatus for inputting, recording, reproducing and outputting a stream of TS packet. The independent claims identify the feature of "the output counter generating an output time for each of the TS packet reproduced from the recording medium; a variable speed counter operable to fluctuate a time base of the output times generated by the output counter; and output controller controlling reproduction so that, for each TS packet reproduced from the recording medium, the arrival time is extracted and compared with the output time, and when the arrival time reaches a time corresponding to the output time, the TS packet reproduced from the recording medium is output, wherein a variable speed reproduction is executed by fluctuating the time base of the output times generated by the output counter". The closest prior art, Park et al discloses a conventional recording/reproducing apparatus, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Park et al discloses a conventional recording/reproducing apparatus.

Kato et al discloses a transport stream recording/reproducing apparatus.
